

Treatment Planning

Dr. Ahmad El-Kouedi

Lecturer of Fixed Prosthodontics

Al-Azhar University

Case 1

- Female
- 21 years old
- Moderate educational level
- Poor economic status
- Wants to improve her “look”
- Complained that previous dentist was a “donkey”!

Pre-operative Picture

Diagnosis

- Loose interdental composite
- Poor esthetic quality
- Chronic inflammation of the gums
- Hypertrophied palatine papilla
- Subgingival calculus
- No thermal response of the right central incisor
- No periodontal looseness

Treatment Plan

- Subgingival scaling and overall improvement of the oral hygiene
- Endodontic treatment of the right insicor
- Removal of the loose filling and restore with a glass ionomer filling material
- placement of temporary crowns until gingival healing
- Placement of ceramo-metallic restoration

Prep of teeth

Temporary crowns

Final Restoration
